## Editorial

# Journal of Cardiology Cases, Official Journal of the Japanese College of Cardiology

*Journal of Cardiology Cases (JC Cases)* is a peer-reviewed online journal dedicated to publishing case report articles, and is one of the official journals of the Japanese College of Cardiology (JCC). *JC Cases* provides an appropriate forum for every cardiologist by rapidly publishing their valuable clinical cases. It encompasses case reports from the entire field of cardiovascular medicine. We appreciate case reports that will impact the practice of clinical cardiology including:

- *Rare diseases or pathological states* that should be remembered by cardiologists.
- *Clinical cases* who received advanced medical, interventional, and/or surgical treatment.
- *New diagnostic methods* that can promote better understanding of the pathophysiology of disease.

Accepted articles are published online soon after acceptance and are compiled every two months into an issue with

volume, issue, and page numbers assigned. E-offprints (PDF) are provided with no charge to the author (print-version offprints are not supplied). Since cardiovascular medicine is a highly visual specialty, the online publication allows high-resolution motion pictures. We believe that *JC Cases* is the best available journal nowadays for publishing cardiologic case reports written in English. We sincerely encourage all JCC members to submit case report articles excelling in originality to the *JC Cases*.
